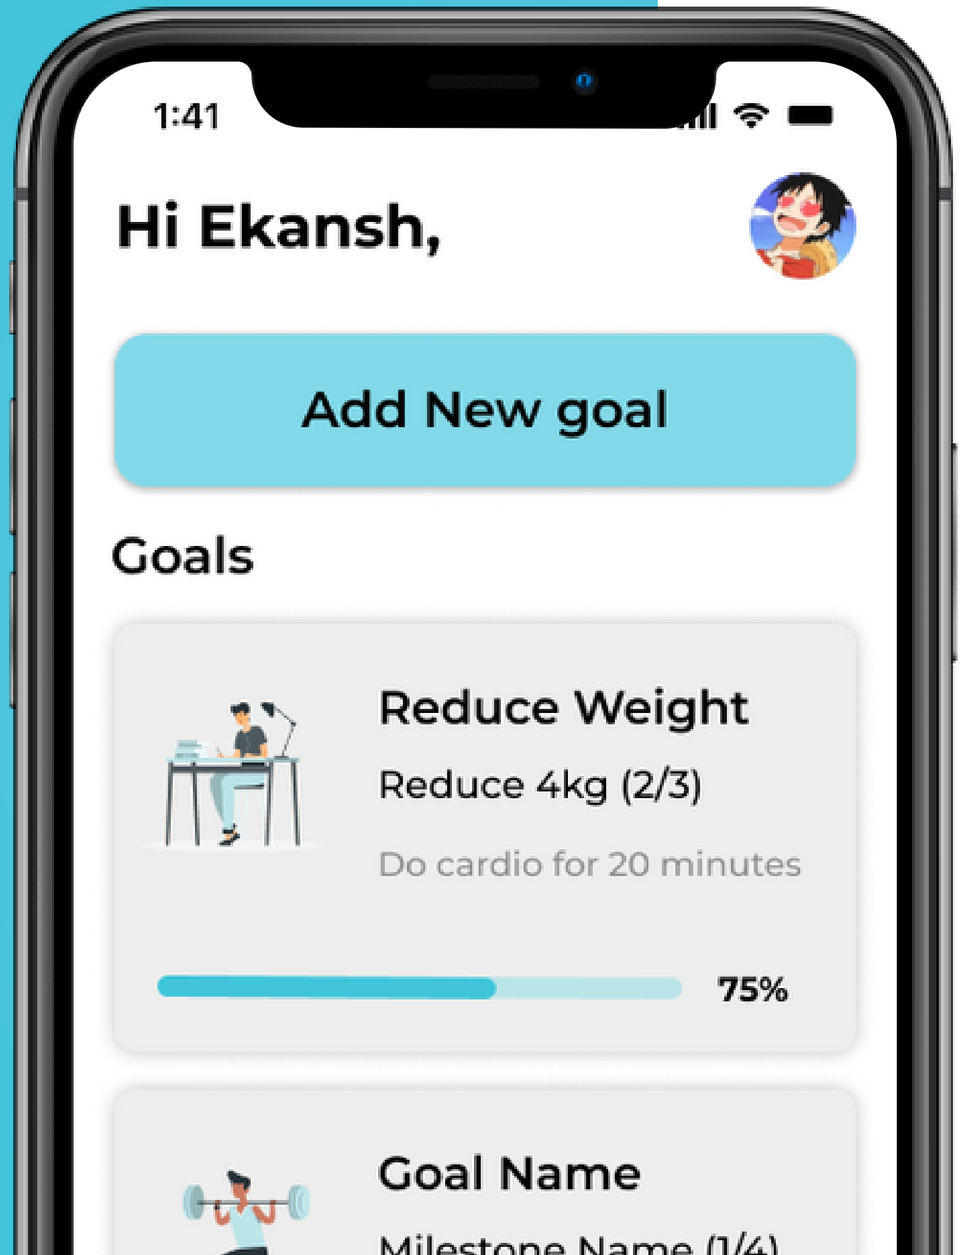
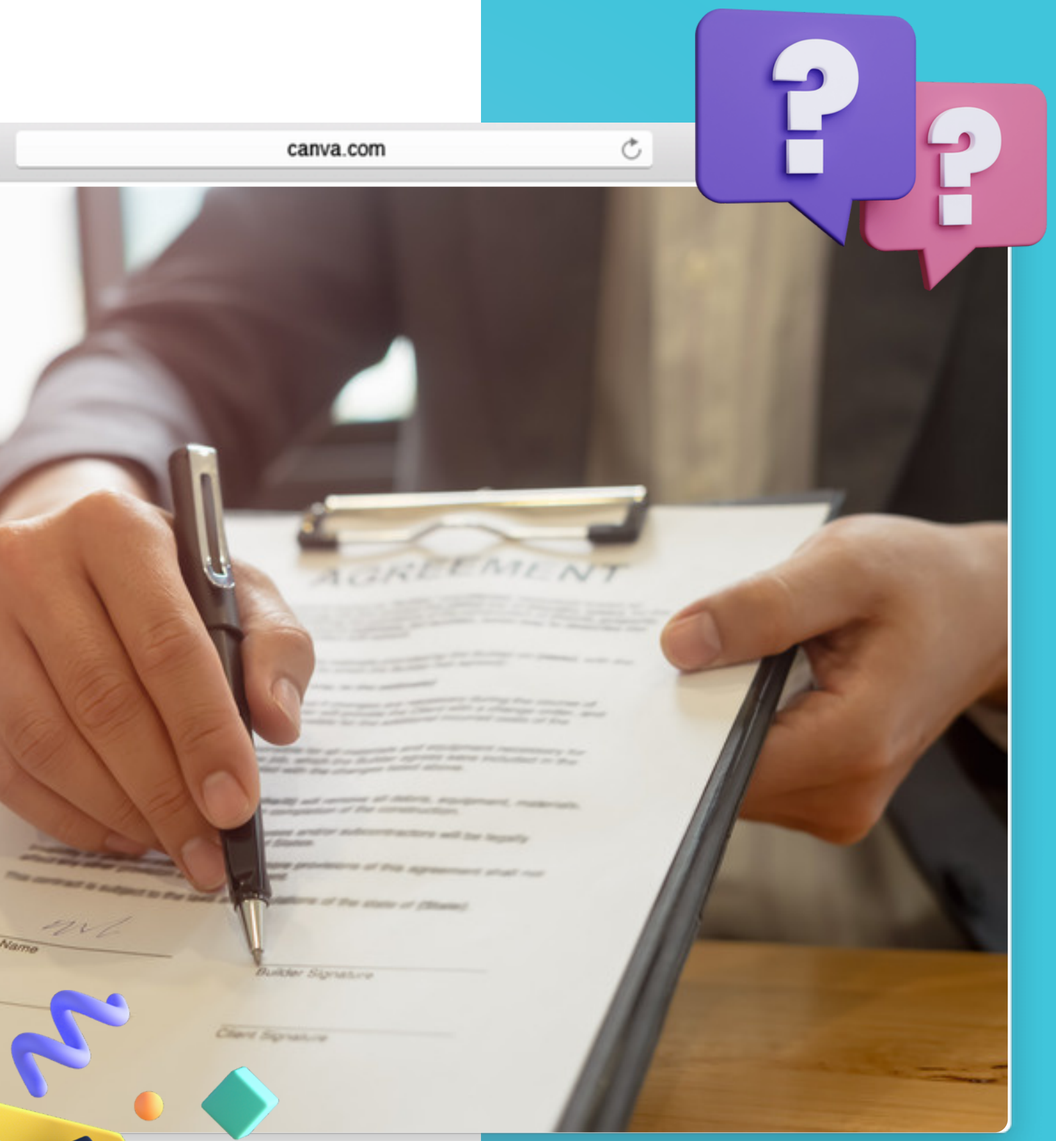
About GoalShip

App allows you to create and share your personal goals with friends and family.





Problem Statement

Lack of Intrinsic Motivation to achieve goals and form habits

Solution # 1 Accountability

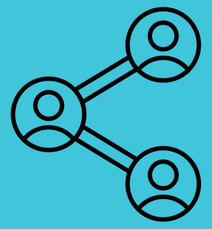
Sharing your goals with friends pushes you and motivates

Solution # 2 Gamification

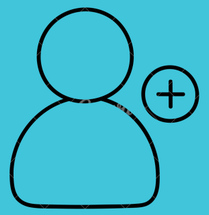
Rewarding users boosts competition and user engagement

Team Roadmap

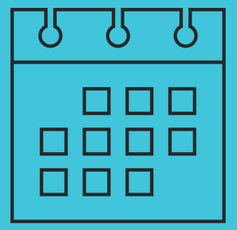
Share Goal with friends

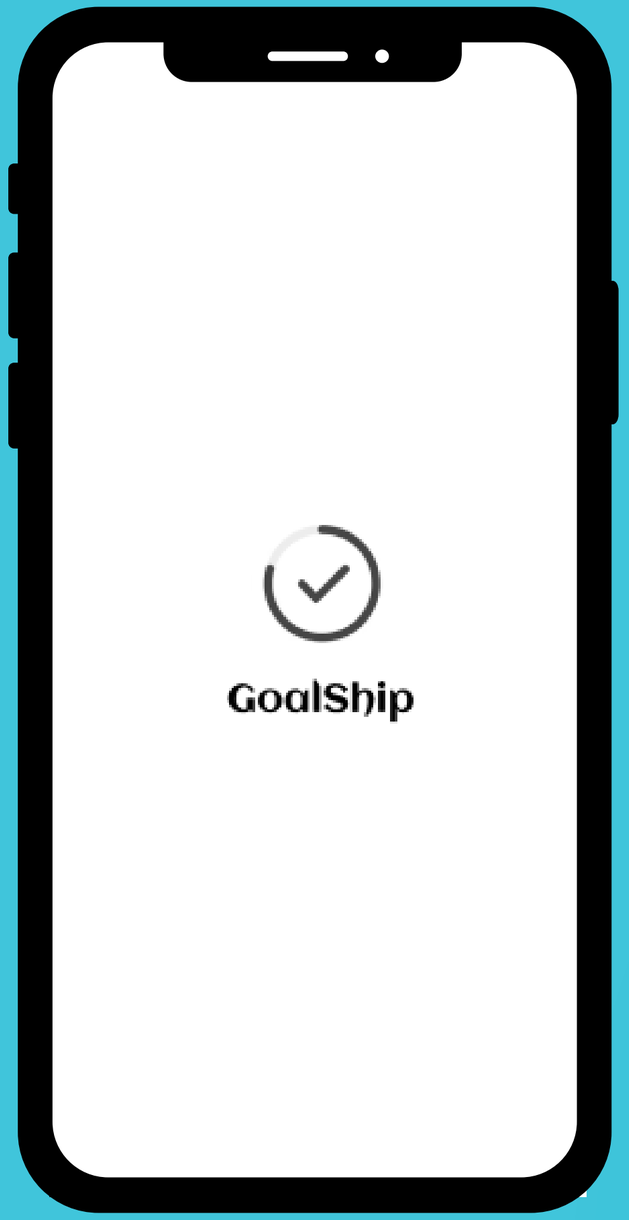


Add friends



Keep Daily, Weekly and Monthly track





Create , Delete, modify Goals

Get Rewards

Achieve the goal!

Tech Stack

Flutter

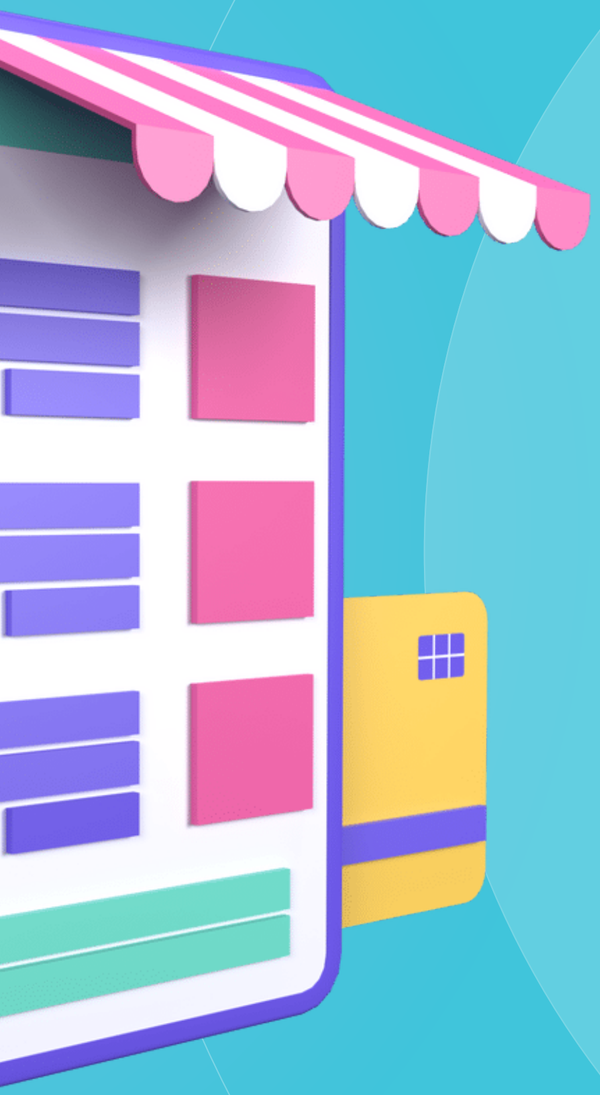
PROTOTYPE

Future Scope



Targeted Articles

The app will suggest articles to users based on their goals. The articles will be curated by experts and will provide valuable insights
and tips related to achieving the specific goal

Progress Prediction

With the help of an AI/ML model, the app will be able to predict a user's progress towards their goals.

Automated Progress Tracking

The app will integrate with various data
sources, such as fitness trackers and productivity apps, to give users a detailed
insight into their performance.

Content Creation

Experts in various fields will post content related to specific
types of goals, providing users with valuable advice and insights.
